

Luxurious *Lazy Daze*

Horizon has launched and delivered *Lazy Daze*, the first model in its new E Series.

Horizon Yachts has launched and delivered a new model in its successful E Series line. An evolution of the Series' popular E88 model, the new E90 combines a performance-oriented hull with a streamlined superstructure.

This first E90 motor yacht was in build as a spec boat for the American market when she was contracted by experienced American yacht owners, who appreciated her classic styling and well-planned four-stateroom layout. The yacht's plentiful deck areas were particularly appealing to the clients, who enjoy cruising the Caribbean and Bahamas.

Upon taking delivery of their new Horizon E90 in the late spring of 2022, the owners and their captain set out for a maiden voyage to the Abacos, where *Lazy Daze* was officially christened at the Horizon Yacht USA's Owners' Rendezvous.

interior volume. She also has the High Performance Piercing Bow (HPPB).

Her airy interior includes an open, country-kitchen-style galley, and she offers inviting accommodation, including a midships full-beam master and forward VIP, plus space aft for four crew.
