

## All set for summer days

The new Horizon FD110 is the largest build to date from the Cor D. Rover-designed Fast Displacement (FD) Series, which is renowned for its high-volume interior and unrivalled stability and performance.

Entertainment and relaxation are the emphasis of the FD110's design. From the spacious aft dining cockpit through the fully opening saloon doors, the main saloon provides a voluminous oasis where L-shaped seating invites conversation and enjoyment of views through the

large windows. A convertible table serves as both a breakfast bar and a formal dining table, with sliding glass doors providing an alfresco feel to the dining area that is served by a professional galley.

The main deck master suite offers expansive views,

and a spacious his-and-hers ensuite with a grand shower.

Below, four ensuite staterooms comprise two mirrored VIPs amidships, a convertible twin to port and a third VIP in the bow. A dedicated laundry room conveniently serves this area.

Left: The new FD110 offers a multitude of entertaining spaces.

There are crew quarters for up to six located aft.

The skylounge offers plentiful seating as well as a wet bar with wine cooler and day head aft. The forward wheelhouse features a high/low window and door, allowing the space to be closed off from the skylounge.

The foredeck features a large social area, including a spa pool, while the upper and sundecks offer even more opportunities for relaxation.

The new FD110 is on schedule to make her US debut this summer.
