

## Striking, spacious and seaworthy

The new Horizon FD77 Skyline is designed for the owner/operator.

**CHARACTERISED BY A STRIKING** exterior profile, an expansive 23' beam, and large sections of floor-to-ceiling windows, Horizon's Fast Displacement (FD) Series has been extremely well received by the global market.

Clients are drawn to this series for a variety of reasons, from the voluminous interior and well-organised layout to the excellent seakeeping ability that provides both performance and efficiency.

To meet the various requests of clients after the FD85 was introduced, Horizon expanded the FD series to include the FD87 Skyline, the FD102 Skyline, and the FD125 Skyline.

Most recently, the yard and designer Cor D. Rover partnered once again to collaborate on a new design, the FD77 Skyline, an entry-level motor yacht for the series that has been specifically designed to appeal to active owner/operators.

Interest from current Horizon owners who operate their own yachts inspired the design of the FD77 Skyline, which retains the same styling

and spacious characteristics of her larger sisters, but comes wrapped in a compact package that affords ease of operation and superior seakeeping performance.

The Horizon FD77 Skyline emphasises spaciousness both inside and out, throughout her four luxurious guest staterooms to her functional outdoor spaces, which will rival 90-plus foot yachts.

A high-performance hull developed by Donald L. Blount & Associates and Horizon's in-house naval architecture team provides superior seakeeping capabilities.

Available in an open flybridge or enclosed bridge version, the FD77 Skyline maximises its impressive interior volume with unique sections of floor-to-ceiling glass windows on the main deck from the salon forward into the master stateroom.

A sliding glass door to starboard in the main salon accesses the exterior walkway leading to the forward deck, further enhancing the openness of this pocket superyacht.

On the lower deck, three additional staterooms, including two VIPs, echo the feeling of spaciousness found throughout.

Aft, a large beach club invites relaxation at sea level, while just forward of the beach club is a full head and additional cabin or crew space.

Designed as an owner/operator concept, the FD77 Skyline is truly a cutting-edge fast displacement motor yacht that offers the space, amenities and styling of a mega yacht that both the owners and guests will enjoy to the fullest.

Hull one of the FD77 Open Bridge was debuted at the recent Palm Beach Boat Show, while the first Horizon FD77 Skyline will debut at SCIBS as stock for sale.

Those who enjoy an owner/operator platform will love the Horizon FD77 Skyline motor yacht. ●
