

# A vacay dream come true

Horizon Yacht Australia is expecting delivery of the new Horizon FD90, the first yacht built for charter.

The first Horizon built to 2C AMSA is nearing completion, scheduled for delivery to Horizon Yacht Australia in July, in time for display at the Sydney International Boat Show.

The FD90 was the brainchild of Horizon Yacht Australia Managing Director Mark Western and Horizon CEO and Co-founder John Lu in response to a significant number of enquiries at the 2021 Sanctuary Cove International Boat Show. “There are very few brands delivering available stock at 2C AMSA certification,” said Western.

“Charter is becoming more popular and the FD90 is unique in that it’s under the 24-metre ruling. It’s the perfect, compact package – it’s the ideal entertainer’s boat.”

Charter is becoming more popular and the FD90 is unique in that it’s under the 24-metre ruling. It’s the perfect, compact package.

Over the 12-month build, Horizon worked with Oceanic Design & Survey at Gold Coast City Marina and BV Surveyors in Taiwan. “Not much about the FD90’s layout had to change, but in every other aspect there are differences that all had to be signed off and certified,” said Western.

Defining features include a large flybridge, a large aft deck with lounge area and bar, as well as additional social
