

Dvogodišnji projekat donosi povećanje proizvodnih kapaciteta i poboljšava efikasnost u Horizon objektima / The two-year project increases production capacity & improves efficiency throughout the Horizon facilities

Horizon Yachts completes \$15M Yard Expansion

Since its establishment nearly 35 years ago, Horizon Yachts has continuously invested in its facilities and equipment to maintain and further its position as one of the world's largest and leading yacht builders. The latest infrastructure investment comes in the form of a brand new 106,745sqft (9,917sqm) production facility constructed on the Horizon grounds in a space formerly used for mold storage. This new space can now accommodate seven yachts up to 120 feet in length and improves production capacity significantly, allowing the group to deliver 20 to 25 new builds per year.

The expansion is the result of a two-year planning process with an overall focus on production efficiency throughout and to this effect includes the re-designation of existing workspaces and an efficient horizontal production queue. The hull production division of Group subsidiary Atech Composites division has also been relocated to the main yard to streamline the manufacturing process of each hull. Now, each critical stage of construction, from hull production to boat assembly and the final testing will be carried out in the same vicinity.

In addition to the new facility, which officially began operations in February 2021, construction is currently underway on a materials warehouse and a brand-new office building designed to house the factory management department. The new building is expected to be completed in early 2022.

Horizon Yachts završava proširenje brodogradilišta u vrednosti od 15 miliona dolara

Od svog osnivanja pre skoro 35 godina, brodogradilište Horizon Yachts je neprestano ulagalo u svoje proizvodne objekte i opremu kako bi održalo i unapredilo svoju poziciju jednog od najvećih i vodećih svetskih proizvođača jahti. Najnovija ulaganja u infrastrukturu dolaze u obliku potpuno novog proizvodnog pogona od 9 917 kvadratnih metara, izgrađenog na zemljištu kompanije Horizon, na prostoru koji se ranije koristio za skladištenje kalupa. Ovaj novi prostor sada može da primi sedam jahti dužine do 120 stopa i značajno poboljšava proizvodne kapacitete, omogućavajući ovoj kompaniji da isporuči 20 do 25 novih plovila godišnje.

Proširenje je rezultat dvogodišnjeg procesa planiranja sa glavnim fokusom na efikasnost proizvodnje u celosti i u tom smislu uključuje reorganizaciju postojećih radnih prostora i efikasan horizontalni sled proizvodnih operacija. Odeljenje za proizvodnju trupa, ogranka podružnice Atech Composites, takođe je premešteno u glavno brodogradilište radi pojednostavljenja proizvodnog procesa za svaki trup. Sada će se sve ključne faze izgradnje, od proizvodnje trupa do montaže broda i završnog testiranja, izvoditi na istoj lokaciji.

Pored novog objekta, koji je zvanično počeo sa radom u februaru 2021. godine, trenutno je u toku izgradnja skladišta za materijal i potpuno nove poslovne zgrade predviđene za smeštaj odeljenja za upravljanje fabrikom. Očekuje se da će nova zgrada biti završena početkom 2022. godine.
