

Horizon PC68

The first choice owners of the new PC68 model need to make is how to use the forward part of the main deck: open salon or on-deck master? One gives a huge entertaining space and the other a full-beam cabin with wraparound windows. Then it's a question of how to use the extended flybridge and Portuguese bridge a deck above, which offer many layout options. But there's more; with its famous flexibility, Horizon works with owners to make changes that go beyond layout and soft goods. How far to go is also up to the operator. At 24 knots, the 68-footer (24' 6" beam) will make 650 nautical miles; or at 10 knots, 1,650 nautical miles is the limit.
